Seeking an Computer Science Engineering position, where I can leverage my skills in Java, C++, and full stack development and knowledge to contribute to a dynamic and challenging environment, focusing on the development of innovative and efficient solutions

Education

NMAM Institute of Technology, Nitte, Karnataka
BE Computer Science and Engineering
2021 - 2025
6.94 CGPA

St. Theresa PU College 28/29, Mallasandra, Bengaluru 560057
- PUC
2019 - 2021
86.5 Percentage

Trishul High School, K. B. Extension, Davangere
Higher Secondary School - SSLC
2019
86.5 Percentage

Technical Skills

Languages: C, C++, Python, Java, SQL
Database: Microsoft SQL Server, MySQL, SQLite
Tools: Visual Studio Code, Spyder, Intellij, SSMS, GitHub

Experience

DLithe Consultancy Services Pvt Ltd Bengaluru
Java Full Stack Development Intern (Git) Jan 2025 - Apr 2025

- Completed 15-week intensive training on full stack development using Java, Spring Boot, React.js, and MySQL.
- Developed RESTful APIs using Spring Boot and implemented user authentication using JWT.
- Created responsive frontend interfaces with React.js and integrated with backend APIs.
- Built modules for real-world applications such as cinema ticket booking, including seat layout, payment flow, and session handling.
- Gained hands-on experience in database schema design, ORM with JPA/Hibernate, and version control with Git & GitHub.

NMAM Institute of Technology Nitte
Summer Internship-II(Git) Feb 2023 - Mar2023

- Designed and implemented a News website using *Hyper Text Markup Language, CSS, Javascript*
- This project is made in PHP language using xampp - localhost we can run the website.

NMAM Institute of Technology Nitte
Summer Internship-I Apr 2022 - Jun 2022

- Worked on project - Sound Wave Fire-Extinguisher

Publications

IEEE Xplore
May 2025

Ashwin Shenoy M, N Thillaiarasu, Bharath S, Chaithanya, Bhoomika N V, Chetan Sangalad. **"A CNN-LSTM Framework for Real-Time Human Action Recognition in Video Sequences."** *2025 International Conference on Artificial Intelligence and Data Engineering (AIDE)*, IEEE, Feb 2025. DOI: 10.1109/AIDE64228.2025.10987297

Projects

Student Result Management (Git) Mar 2024 - May 2024

- Developed a student result management system where courses are taken by students of different states. There are two users, one is an admin and another is a student.
- Admin can add students, their results, can create courses, can view their result in graphs i.e., Data Visualisation.
- Students can only view their results on the student homepage.
- **Tech Stack:** Python, Tkinter,SQLite,Matplotlib

Hospital Management (Git) Nov 2023 - Dec 2023

- Developed a Database management project on hospital management system where there are three users - Doctor, Patient, Admin. Admin can add doctors and manage both doctor and patient homepage.
- Patients can register their profile and can write the disease they are suffering from. Whereas, Doctors read the patients description and their disease where they will prescribe the medicine to the patients.
- **Tech Stack:** Php, HTML, JavaScript, Microsoft SQL Server, CSS

Heart Disease Analysis (Git) Dec 2022 - Jan 2023

- Conducted comprehensive heart disease analysis to uncover potential health insights and patterns. Using R, we explore various aspects of heart health, focusing on cholesterol levels, chest pain types, and other cardiovascular indicators.
- Tech Stack: R programming, dplyr, plotrix
